DECLASS REVIEW BY NIMA / DoD

STATIC TEST FACILITY NEAR VORONEZH, USSR

Further study of the Voronezh static test facility at 51-35N 30-09E, about 5 nautical miles south of Voronezh, USSR, indicates that it has been tripled in size since it was observed on TALENT photography of [REDACTED]. Its location along several ravines and the degree of activity indicate the probability of additional test stands having been constructed. However, the poor image quality and small scale of KEYHOLE photography of [REDACTED] preclude detailed interpretation.
